

Subject 2600

September 26, 2018

SUMMARY OF TOPICS

The following topics were discussed at the meeting of the Standards Technical Panel for Relocatable Structures, STP 2600:

1. Comments and Proposed Changes Received from Adaire Chown

A meeting of the Standards Technical Panel of UL Relocatable Structures, STP 2600, was held on September 18, 2018 via web conference. The purpose of the meeting was for the STP to finalize the proposed Third Edition of CAN/UL 2600 for ballot.

The purpose of the STP meeting report is to briefly summarize discussions held during the meeting, and to document any resulting outcomes, including planned future action.

CALL TO ORDER, ANNOUNCEMENTS, INTRODUCTION OF MEMBERS, GUESTS, AND OBSERVERS

The meeting was called to order at 11:00AM EDT. The meeting was held online, using GoToMeeting technology. The STP Chair welcomed attendees and verified who was on the call. A list of meeting attendees is at the end of this report. The STP Project Manager then verified the meeting attendees again. The STP Chair summarized the protocol for the meeting, and the rules and regulations governing Standards Technical Panels, including UL's patent policy and Anti-trust rules.

STP BALANCE SUMMARY

The current balance of the STP was discussed at the meeting and is shown in the following table:

Interest Category	Number of Members	Interest Category	Number of Members
Producers	4 (27%)	Government	1 (7%)
Testing & Standards Organizations	1(7%)	Consumer	0
Supply Chain	1 (7%)	General Interest	5 (33%)
AHJs	3 (18%)	Commercial/Industrial User	1 (7%)

UL's goal is to have no interest category comprise more than one-third of the STP membership.

FUTURE MEETING SCHEDULE

The STP Chair reminded the attendees that three more web conferences have been scheduled at 11:00AM–1:00PM ET on October 3, October 17, and November 8.

Secretary's Note: At the time this report was issued, the second upcoming web conference was postponed to October 25.

1. Comments and Proposed Changes Received from Adaire Chown

DISCUSSION

Discussion item submitted by: Adaire Chown, CodeSmith

The STP Chair informed the attendees that the intention is to send the draft out to ballot as a clean version, because otherwise the amount of mark-ups would make the draft unreadable. There was general agreement that a clean draft should be sent out for ballot.

The STP Chair then referred the attendees to the draft “2018-09-15_UL 2600_after 2018-09-14 WG Call” provided by Adaire Chown. All the proposed revisions reviewed were accepted, with the following exceptions/changes:

Before reviewing Subsection 13.2, Exposing Building Faces, Adaire provided a presentation on what she had considered to arrive at the fire-resistance rating and R-value requirements. Refer to the “Size, Weight, fr, R-Value_2018-09-16.pdf” file in the CSDS Meeting Area for the presentation.

For Clause 17.2.1, it was agreed to revise the clause to:

“Main truck ducts for space heating and ventilation systems shall be constructed of galvanized steel.”

Regarding “Vehicular Requirements for single-Module Relocatable buildings Constructed on Chassis with Running Gear”, it was agreed that an Annex note would be appropriate.

Relating to Clause 22.2.2.2, there was a lot of discussion on whether to require modifications to be done in a factory. There was general agreement to add an Annex note to address this. Adaire agreed to work with Larry to come up with the Annex note **(ACTION)**.

The STP Chair then referred the attendees to the report submitted by the subcommittee (Calvin, Larry, Ron) on vinyl covered gypsum board joints in fire rated assemblies. Larry provided an overview of what the subcommittee has done to date. Following further discussion, there was general agreement to address this in the standard when the data becomes available.
