Revision pages for

Standard for

Automotive Glass-Tube Fuses

UL 275, Ninth Edition

Attached to this transmittal notice is a reprinted title page for the Ninth edition of UL 275.

Attention is directed to the note on the title page of this standard outlining the procedure to be followed to retain the approved text of ANSI/UL 275-1995.

Revised and/or additional pages may be issued from time to time.

With the inclusion of the accompanying material, the standard consists of pages dated as shown in the following checklist:

Page	Date
1	December 14, 1993 (Reprinted July 13, 1995)
2	—
3 – 7	December 14, 1993

DECEMBER 14, 1993
(Title Page Reprinted: July 13, 1995)

1

UL 275

Standard for

Automotive Glass-Tube Fuses

First Edition – January, 1924
Second Edition – April, 1938
Third Edition – July, 1950
Fourth Edition – February, 1952
Fifth Edition – December, 1957
Sixth Edition – May, 1973

The First through Sixth editions were numbered UL 275B.

Seventh Edition – August, 1978
Eighth Edition – June, 1986

Ninth Edition

December 14, 1993

Approval as an American National Standard (ANSI) covers the numbered paragraphs on pages dated December 14, 1993. These pages should not be discarded when revised or additional pages are issued if it is desired to retain the ANSI approved text.

An effective date included as a note immediately following certain requirements is one established by Underwriters Laboratories Inc.

Approved as ANSI/UL 275-1995, April 18, 1995

Revisions of this standard will be made by issuing revised or additional pages bearing their date of issue. A UL Standard is current only if it incorporates the most recently adopted revisions, all of which are itemized on the transmittal notice that accompanies the latest published set of revision pages.

Underwriters Laboratories Inc., founded in 1894, is chartered as a not-for-profit organization without capital stock, under the laws of the State of Delaware, to establish, maintain, and operate laboratories for the examination and testing of devices, systems and materials to determine their relation to hazards to life and property, and to ascertain, define and publish standards, classifications and specifications for materials, devices, products, equipment, constructions, methods, and systems affecting such hazards.

UL Standards for Safety are developed under a procedure which provides for participation and comment from the affected public as well as industry. The procedure takes into consideration a survey of known existing standards and the needs and opinions of a wide variety of interests concerned with the subject matter of the standard. Thus manufacturers, consumers, individuals associated with consumer-oriented organizations, academicians, government officials, industrial and commercial users, inspection authorities, insurance interests and others provide input to UL in the formulating of UL Standards for Safety, to keep them consonant with social and technological advances.
