

Subject 3100

September 21, 2018

SUMMARY OF TOPICS

The Standard for Automated Guided Vehicles (AGVs), ANSI/CAN/UL 3100, is being proposed.

1. The proposed first edition of the Standard for Automated Guided Vehicles (AGVs), ANSI/CAN/UL 3100, covers battery-operated operated AGVs that are intended to be used indoors in a commercial or industrial environment. The AGVs covered by this standard include Industrial Truck AGVs (inherently load bearing), load bearing service AGVs, and non-load bearing service AGVs, as defined within this standard. The AGV is battery powered using either lead acid batteries or lithium ion based batteries that are charged through a conductive system while either on board or off board the vehicle.

STP BALLOTS AND ALL COMMENTS DUE: November 20, 2018

UL's goal is to have no interest category comprise more than one-third of the STP membership balance. To improve the current balance for STP 3100, UL is looking for participants in the following interest categories: AHJ, Commercial/Industrial User, Consumer, General, Government, and Testing & Standards. Definitions for these interest categories are available on the Standards STP Internet site:

<http://ulstandards.ul.com/develop-standards/participation/interest-categories/>

If you are interested in applying for STP 3100 membership or are aware of potential candidates for this STP, please contact the STP Project Manager, Megan.Monsen@ul.com.
