Revision pages for

Standard for

Heat Responsive Links for Fire-Protection Service

UL 33, Sixth Edition

Attached to this transmittal notice is a reprinted title page for the Sixth edition of UL 33.

Attention is directed to the note on the title page of this standard outlining the procedure to be followed to retain the approved text of ANSI/UL 33-1995.

Attention is directed to the note on the title page of this standard identifying that the Department of Defense has adopted the text of UL 33.

Revised and/or additional pages may be issued from time to time.

With the inclusion of the accompanying material, the standard consists of pages dated as shown in the following checklist:

Page	Date
1	October 18, 1993 (Reprinted August 10, 1995)
2	—
3 – 15, A1 – A3	October 18, 1993

OCTOBER 18, 1993
(Title Page Reprinted: August 10, 1995)

1

UL 33

Standard for

Heat Responsive Links for Fire-Protection Service

The first, second and third editions were titled "Fusible Links for Fire-Protection Service."

First Edition – November, 1968
Second Edition – July, 1973
Third Edition – March, 1980
Fourth Edition – June, 1982
Fifth Edition – October, 1987

Sixth Edition

October 18, 1993

Approval as an American National Standard (ANSI) covers the numbered paragraphs on pages dated October 18, 1993. These pages should not be discarded when revised or additional pages are issued if it is desired to retain the ANSI approved text.

An effective date included as a note immediately following certain requirements is one established by Underwriters Laboratories Inc.

Approved as ANSI/UL 33-1987, April 17, 1987
Approved as ANSI/UL 33-1995, May 10, 1995

The Department of Defense (DoD) has adopted UL 33 on November 18, 1987. The publication of revised pages or a new edition of this Standard will not invalidate the DoD adoption.

Revisions of this standard will be made by issuing revised or additional pages bearing their date of issue. A UL Standard is current only if it incorporates the most recently adopted revisions, all of which are itemized on the transmittal notice that accompanies the latest published set of revision pages.

Underwriters Laboratories Inc., founded in 1894, is chartered as a not-for-profit organization without capital stock, under the laws of the State of Delaware, to establish, maintain, and operate laboratories for the examination and testing of devices, systems and materials to determine their relation to hazards to life and property, and to ascertain, define and publish standards, classifications and specifications for materials, devices, products, equipment, constructions, methods, and systems affecting such hazards.

UL Standards for Safety are developed under a procedure which provides for participation and comment from the affected public as well as industry. The procedure takes into consideration a survey of known existing standards and the needs and opinions of a wide variety of interests concerned with the subject matter of the standard. Thus manufacturers, consumers, individuals associated with consumer-oriented organizations, academicians, government officials, industrial and commercial users, inspection authorities, insurance interests and others provide input to UL in the formulating of UL Standards for Safety, to keep them consonant with social and technological advances.
