OUTLINE OF INVESTIGATION
FOR
NAMEPLATE, DATASHEET, AND SAMPLING REQUIREMENTS OF
PHOTOVOLTAIC MODULES

Issue Number: 1

SEPTEMBER 14, 2012

Summary of Topics

This is the first issue of the Outline of Investigation for Nameplate, Datasheet, and Sampling Requirements of Photovoltaic Modules, which covers the required information on the production and measurement tolerances of nameplate rating of flat plate photovoltaic (PV) modules, and does not apply to concentrator PV modules. This outline identifies five rating conditions under which the performance parameters of PV modules shall be reported and a statistical method to determine the number of samples required for the power rating measurements.
