

Subject 495

June 30, 2017

SUMMARY OF TOPICS

The following changes in requirements to the Standard for Power-Operated Dispensing Devices for LP-Gas, UL 495, are being proposed:

1. Revision to Hose and Coupling Requirements

STP BALLOTS AND ALL COMMENTS DUE: JULY 31, 2017

UL's goal is to have no interest category comprise more than one-third of the STP membership balance. To improve the current balance for STP 87, UL is looking for participants in the AHJ, Commercial/Industrial User, Government, and Testing & Standards interest categories. Definitions for these interest categories are available on the Standards STP Internet site:

<http://ulstandards.ul.com/develop-standards/participation/interest-categories/>

If you are interested in applying for STP 87 membership or are aware of potential candidates for this STP, please contact the STP Project Manager, Marcia.M.Kawate@ul.com.

For your convenience in review, proposed additions to existing requirements are shown underlined and proposed deletions are shown ~~lined-out~~.

1. Revision to Hose and Coupling Requirements

RATIONALE

Proposal submitted by: Edgar Wolff-Klammer, UL LLC

The UL 495 standard currently states that a hose supplied with the dispensing device shall be provided with nonferrous couplings attached to the hose and does not indicate the Standard for LP-Gas Hose, UL 21. Therefore, paragraph 16.1 is being revised to include a reference to UL 21.

PROPOSAL

16 Hose and Couplings

16.1 A hose supplied with the dispensing device shall comply with the Standard for LP-Gas Hose, UL 21 ~~be provided with nonferrous couplings attached to the hose.~~
