Revision pages for

Standard for

Protectors for Data Communication and Fire Alarm Circuits

UL 497B, Second Edition

Attached to this transmittal notice is a reprinted title page for the second edition of UL 497B.

Attention is directed to the note on the title page of this standard outlining the procedure to be followed to retain the approved text of ANSI/UL 497B-1994.

Revised and/or additional pages may be issued from time to time.

With the inclusion of the accompanying material, the standard consists of pages dated as shown in the following checklist:

Page	Date
1	December 28, 1993 (Reprinted October 20, 1994)
2	—
3 – 19	December 28, 1993

DECEMBER 28, 1993
(Title Page Reprinted: October 20, 1994)

1

UL 497B

Standard for

**Protectors for Data Communication
and Fire Alarm Circuits**

Prior to the first edition, the requirements for the products covered by this standard were included in the Standard for Protectors for Communications Circuits, UL 497.

First Edition – January, 1987

Second Edition

December 28, 1993

Approval as an American National Standard (ANSI) covers the numbered paragraphs on pages dated December 28, 1993. These pages should not be discarded when revised or additional pages are issued if it is desired to retain the ANSI approved text.

An effective date included as a note immediately following certain requirements is one established by Underwriters Laboratories Inc.

Approved as ANSI/UL 497B-1987, July 9, 1987
Approved as ANSI/UL 497B-1994, August 30, 1994

Revisions of this standard will be made by issuing revised or additional pages bearing their date of issue. A UL Standard is current only if it incorporates the most recently adopted revisions, all of which are itemized on the transmittal notice that accompanies the latest published set of revision pages.

Underwriters Laboratories Inc., founded in 1894, is chartered as a not-for-profit organization without capital stock, under the laws of the State of Delaware, to establish, maintain, and operate laboratories for the examination and testing of devices, systems and materials to determine their relation to hazards to life and property, and to ascertain, define and publish standards, classifications and specifications for materials, devices, products, equipment, constructions, methods, and systems affecting such hazards.

UL Standards for Safety are developed under a procedure which provides for participation and comment from the affected public as well as industry. The procedure takes into consideration a survey of known existing standards and the needs and opinions of a wide variety of interests concerned with the subject matter of the standard. Thus manufacturers, consumers, individuals associated with consumer-oriented organizations, academicians, government officials, industrial and commercial users, inspection authorities, insurance interests and others provide input to UL in the formulating of UL Standards for Safety, to keep them consonant with social and technological advances.

Standard for

Protectors for Data Communication and Fire Alarm Circuits

UL 497B, Second Edition

Accompanying this transmittal notice is a copy of the second edition of UL 497B.

THIS EDITION OF THE STANDARD IS NOW IN EFFECT.

Revised and/or additional pages may be issued from time to time.

Subscribers to UL's services in the area covered by this standard will receive these revised and/or additional pages automatically. Others may receive such pages by subscribing to UL's subscription service for revisions. See UL's CATALOG OF STANDARDS FOR SAFETY for a description of the revision subscription service, the cost of the service for this standard, and ordering information.
