National Differences For

UL 60974-1

Standard for Arc Welding Equipment; Part 1: Welding Power Sources

Edition: 1

Edition Date: March 17, 2005

This is the publication of the first edition of UL 60974-1 which includes the adoption of the UL national differences to IEC 60974-1.

This document provides a single listing of the National Differences included in the UL adoption of the corresponding IEC standard. Editorial differences appearing in the UL standard are not included in this technical compilation. The complete listing of National Differences is available in the UL standard.

The master for this standards document at UL's Northbrook Office is the official standards document insofar as it relates to a UL service and the compliance of a product with respect to the requirements for that product and service, or if there are questions regarding the accuracy of this document.

UL's standards documents are copyrighted by UL. Neither a printed copy of a standards document, nor the electronic file for a standards document should be altered in any way. All of UL's standards documents and all copyrights, ownerships, and rights regarding those standards documents shall remain the sole and exclusive property of UL.

All rights reserved. No part of this standards document may be reproduced, stored in a retrieval system, or transmitted in any form by any means, electronic, mechanical photocopying, recording, or otherwise without prior permission of UL.

UL provides this standards document "as is" without warranty of any kind, either expressed or implied, including but not limited to, the implied warranties of merchantability or fitness for any purpose.

In no event will UL be liable for any special, incidental, consequential, indirect or similar damages, including loss of profits, lost savings, loss of data, or any other damages arising out of the use of or the inability to use this standards document, even if UL or an authorized UL representative has been advised of the possibility of such damage. In no event shall UL's liability for any damage ever exceed the price paid for this standards document, regardless of the form of the claim.

UL reserves the right to change the format, presentation, file types and formats, delivery methods and formats, and the like of both its printed and electronic Standards documents without prior notice.

Purchasers of the electronic versions of UL's standards documents agree to defend, indemnify, and hold UL harmless from and against any loss, expense, liability, damage, claim, or judgement (including reasonable attorney's fees) resulting from any error or deviation introduced while purchaser is storing an electronic standards document on the purchaser's computer system.

If a single-user version electronic standards document was purchased, one copy of this standards document may be stored on the hard disk of a single personal computer, or on a single LAN file-server or the permanent storage device of a multiple-user computer, or made available through the purchaser's Intranet in such a manner that this standards document may only be accessed by one user at a time and for which there is no possibility of multiple simultaneous, concurrent access.

If a multiple-user version electronic standards document was purchased, one copy of the standards document may be stored on a single LAN file-server, or on the permanent storage device of a multiple-user computer, or made available through the purchaser's Intranet. The number of simultaneous, concurrent users shall not exceed the number of users authorized.

Electronic standards documents are intended for on-line use, such as for viewing the requirements of a standards document, conducting a word search, and the like. Only one copy of the standards document may be printed from each single-user version of an electronic standards document. Only one copy of the standards document may be printed for each authorized user of a multiple-user version of an electronic standards document. Because of differences in the computer/software/printer setup used by UL and those of electronic standards document purchaser's, the printed copy obtained by a purchaser may not look exactly like the on-line screen view or the printed standards document.

An employee of an organization purchasing a UL standards document can make a copy of the page or pages being viewed for their own fair and/or practical internal use.
