UL Standard for Safety for Explosive Atmospheres – Part 6: Equipment Protection by Liquid Immersion "o", UL 60079-6

Fourth Edition, Dated April 29, 2016

Summary of Topics

Adoption of IEC 60079-6, Explosive Atmospheres - Part 6: Equipment Protection by Liquid Immersion "o" (fourth edition issued by IEC February 2015) as a new IEC-based UL standard, UL 60079-6 with US Differences.

The requirements are substantially in accordance with Proposal(s) on this subject dated January 29, 2016.

All rights reserved. No part of this publication may be reproduced, stored in a retrieval system, or transmitted in any form by any means, electronic, mechanical photocopying, recording, or otherwise without prior permission of UL.

UL provides this Standard "as is" without warranty of any kind, either expressed or implied, including but not limited to, the implied warranties of merchantability or fitness for any purpose.

In no event will UL be liable for any special, incidental, consequential, indirect or similar damages, including loss of profits, lost savings, loss of data, or any other damages arising out of the use of or the inability to use this Standard, even if UL or an authorized UL representative has been advised of the possibility of such damage. In no event shall UL's liability for any damage ever exceed the price paid for this Standard, regardless of the form of the claim.

Users of the electronic versions of UL's Standards for Safety agree to defend, indemnify, and hold UL harmless from and against any loss, expense, liability, damage, claim, or judgment (including reasonable attorney's fees) resulting from any error or deviation introduced while purchaser is storing an electronic Standard on the purchaser's computer system.

ANSI/UL 60079-6-2016

UL 60079-6

**Standard for Explosive Atmospheres – Part 6: Equipment Protection by
Liquid Immersion "o"**

First Edition – December, 2002

Second Edition – March, 2007

Third Edition – July, 2009

Fourth Edition

April 29, 2016

This ANSI/UL Standard for Safety consists of the Fourth Edition.

The most recent designation of ANSI/UL 60079-6 as an American National Standard (ANSI) occurred on April 29, 2016. ANSI approval for a standard does not include the Cover Page, Transmittal Pages, Title Page or Preface. The National Difference Page and IEC Foreword are also excluded from the ANSI approval of IEC-based standards.

Comments or proposals for revisions on any part of the Standard may be submitted to UL at any time. Proposals should be submitted via a Proposal Request in UL's On-Line Collaborative Standards Development System (CSDS) at <http://csds.ul.com>.

UL's Standards for Safety are copyrighted by UL. Neither a printed nor electronic copy of a Standard should be altered in any way. All of UL's Standards and all copyrights, ownerships, and rights regarding those Standards shall remain the sole and exclusive property of UL.

CONTENTS

Preface (UL)	4
National Differences	6
FOREWORD	7
1 Scope	9
2 Normative references	9
3 Terms and definitions	10
4 Constructional requirements	11
4.1 General	11
4.2 Levels of protection and requirements of electrical equipment	12
4.3 Switching device	13
4.4 Creepage and clearance	13
4.5 Liquid containment enclosures	13
4.6 Immersion depth	15
4.7 Protective liquid level indication	15
4.8 Temperature limitations	16
4.9 Field wiring connections to liquid immersion equipment	17
4.10 Constructional elements of enclosures	17
5 Protective Liquid	17
5.1 Protective liquid specification	17
5.2 Detailed alternative specification	18
5.3 Group I equipment	19
5.4 Liquid contamination and gassing that may result from arcing	19
5.5 Total volume of the protective liquid	19
6 Verifications and tests	19
6.1 Type tests	19
6.2 Routine tests	21
7 Marking	21
8 Instructions	22

Annex A (~~normative~~) (informative) Selection and erection requirements

Annex B (~~normative~~) (informative) Maintenance requirements

Annex C (~~normative~~) (informative) Repair and Overhaul requirements

Bibliography

Preface (UL)

This UL Standard is based on IEC Publication 60079-6: fourth edition Explosive atmospheres – Part 6: Equipment protection by liquid immersion “o”. IEC publication 60079-6 is copyrighted by the IEC.

The text, figures and tables of IEC Publication Explosive atmospheres – Part 6: Equipment protection by liquid immersion “o”, IEC 60079-6, copyright February 2015 are used in this Standard with the consent of the IEC and the American National Standards Institute (ANSI). The IEC copyrighted material has been reproduced with permission from ANSI. ANSI should be contacted regarding the reproduction of any portion of the IEC material. The IEC Foreword and Introduction are not a part of the requirements of this Standard but are included for information purposes only. Copies of IEC Publication 60079-6 may be purchased from ANSI, 11 West 42nd Street, New York, New York, 10036, (212) 642-4900.

Note – Although the intended primary application of this Standard is stated in its Scope, it is important to note that it remains the responsibility of the users of the Standard to judge its suitability for their particular purpose.

The following people served as members of STP 60079 and participated in the review of this standard:

National Differences

National Differences from the text of International Electrotechnical Commission (IEC) Publication 60079-6, Explosive atmospheres – Part 6: Equipment protection by liquid immersion “o” copyright 2015 are indicated by notations (differences) and are presented within the body of the UL printed standard in bold text with legislative mark-ups (strike-out and underline).

There are five types of National Differences as noted below. The difference type is noted on the first line of the National Difference in the standard. The standard may not include all types of these National Differences.

D1 – These are National Differences which are based on **basic safety principles and requirements**, elimination of which would compromise safety for consumers and users of products.

D2 – These are national differences from IEC requirements based on existing **safety practices**. These requirements reflect national safety practices, where empirical substantiation (for the IEC or national requirement) is not available or the text has not been included in the IEC standard.

DC – These are National Differences based on the **component standards** and will not be deleted until a particular component standard is harmonized with the IEC component standard.

DE – These are National Differences based on **editorial comments or corrections**.

DR – These are National Differences based on the **national regulatory requirements**.

Each national difference contains a description of what the national difference entails. Typically one of the following words is used to explain how the text of the national difference is to be applied to the base IEC text:

Addition / Add - An addition entails adding a complete new numbered clause, subclause, table, figure, or annex. Addition is not meant to include adding select words to the base IEC text.

Deletion / Delete - A deletion entails complete deletion of an entire numbered clause, subclause, table, figure, or annex without any replacement text.

Modification / Modify - A modification is an altering of the existing base IEC text such as the addition, replacement or deletion of certain words or the replacement of an entire clause, subclause, table, figure, or annex of the base IEC text.
