UL Standard for Safety for Automatic Electrical Controls – Part 2-12: Particular Requirements for Electrically Operated Door Locks, UL 60730-2-12

Third Edition, Dated May 11, 2017

### **Summary of Topics**

***UL 60730-2-12 is an adoption of the third edition of IEC 60730-2-12 with national differences. This new edition dated May 11, 2017 was issued to reflect the latest approval date as an American National Standard that was proposed February 10, 2017.***

The requirements are substantially in accordance with Proposal(s) on this subject dated February 10, 2017.

All rights reserved. No part of this publication may be reproduced, stored in a retrieval system, or transmitted in any form by any means, electronic, mechanical photocopying, recording, or otherwise without prior permission of UL.

UL provides this Standard “as is” without warranty of any kind, either expressed or implied, including but not limited to, the implied warranties of merchantability or fitness for any purpose.

In no event will UL be liable for any special, incidental, consequential, indirect or similar damages, including loss of profits, lost savings, loss of data, or any other damages arising out of the use of or the inability to use this Standard, even if UL or an authorized UL representative has been advised of the possibility of such damage. In no event shall UL’s liability for any damage ever exceed the price paid for this Standard, regardless of the form of the claim.

Users of the electronic versions of UL’s Standards for Safety agree to defend, indemnify, and hold UL harmless from and against any loss, expense, liability, damage, claim, or judgment (including reasonable attorney’s fees) resulting from any error or deviation introduced while purchaser is storing an electronic Standard on the purchaser’s computer system.

## UL 60730-2-12

### Standard for Automatic Electrical Controls – Part 2-12: Particular Requirements for Electrically Operated Door Locks

Prior to the second edition of UL 60730-2-12, the requirements for the products covered by this Standard were included in UL 60730-2-12A.

First Edition – February, 2002

Second Edition – June, 2014

#### Third Edition

May 11, 2017

This ANSI/UL Standard for Safety consists of the Third Edition.

The most recent designation of ANSI/UL 60730-2-12 as an American National Standard (ANSI) occurred on May 11, 2017. ANSI approval for a standard does not include the Cover Page, Transmittal Pages, Title Page or Preface. The National Difference Page and IEC Foreword are also excluded from the ANSI approval of IEC-based standards.

Comments or proposals for revisions on any part of the Standard may be submitted to UL at any time. Proposals should be submitted via a Proposal Request in UL's On-Line Collaborative Standards Development System (CSDS) at <https://csds.ul.com>.

UL's Standards for Safety are copyrighted by UL. Neither a printed nor electronic copy of a Standard should be altered in any way. All of UL's Standards and all copyrights, ownerships, and rights regarding those Standards shall remain the sole and exclusive property of UL.

| 1.1 Scope .....                                                                                                                                   | 11       |
| 2 Terms and definitions .....                                                                                                                     | 12       |
| 2.2 Definitions of types of control according to purpose .....                                                                                    | 12       |
| 2.3 Definitions relating to the function of controls .....                                                                                        | 13       |
| 3 General requirements .....                                                                                                                      | 13       |
| 4 General notes on tests .....                                                                                                                    | 13       |
| 4.1 Conditions of test .....                                                                                                                      | 13       |
| 5 Rating .....                                                                                                                                    | 13       |
| 6 Classification .....                                                                                                                            | 13       |
| 6.3 According to their purpose .....                                                                                                              | 14       |
| 6.4 According to features of automatic action .....                                                                                               | 14       |
| 7 Information .....                                                                                                                               | 14       |
| 7.2 Methods of providing information .....                                                                                                        | 14       |
| 8 Protection against electric shock .....                                                                                                         | 15       |
| 9 Provision for protective earthing .....                                                                                                         | 15       |
| 10 Terminals and terminations .....                                                                                                               | 15       |
| 11 Constructional requirements .....                                                                                                              | 15       |
| 12 Moisture and dust resistance .....                                                                                                             | 15       |
| 13 Electric strength and insulation resistance .....                                                                                              | 15       |
| 14 Heating .....                                                                                                                                  | 15       |
| 15 Manufacturing deviation and drift .....                                                                                                        | 15       |
| 16 Environmental stress .....                                                                                                                     | 16       |
| 17 Endurance .....                                                                                                                                | 16       |
| 17.3 Thermal conditions for the tests .....                                                                                                       | 16       |
| 17.4 Manual and mechanical conditions for the tests .....                                                                                         | 17       |
| 17.7 Overvoltage (or, in Canada and the USA, overload) test of automatic action at accelerated rate .....                                         | 17       |
| 17.8 Test of automatic action at accelerated rate .....                                                                                           | 18       |
| 17.9 Test of automatic action at slow rate .....                                                                                                  | 18       |
| 17.10 Overvoltage (or overload test in Canada USA and 17.10 all countries that use the overload test) of manual action at accelerated speed ..... | 18       |
| 17.11 Test of manual action at slow speed .....                                                                                                   | 18       |
| 17.12 Test of manual action at high speed .....                                                                                                   | 19       |
| 17.13 Test of manual action at accelerated speed .....                                                                                            | 19       |
| 18 Mechanical strength .....                                                                                                                      | 19       |
| 18.101 Locking tests .....                                                                                                                        | 19       |
| 19 Threaded parts and connections .....                                                                                                           | 20       |
| 20 Creepage distances, clearances and distances through solid insulation .....                                                                    | 20       |
| 21 Resistance to heat, fire and tracking .....                                                                                                    | 20       |
| 22 Resistance to corrosion .....                                                                                                                  | 20       |
| 23 Electromagnetic compatibility (EMC) requirements – Emission .....                                                                              | 20       |
| 24 Components .....                                                                                                                               | 20       |
| 25 Normal operation .....                                                                                                                         | 20       |

## Preface (UL)

This UL Standard is based on IEC Publication 60730-2-12:2015 third edition Automatic Electrical Controls – Part 2-12: Particular Requirements for Electrically Operated Door Locks. IEC publication 60730-2-12 is copyrighted by the IEC.

This UL Standard 60730-2-12 Standard for Safety for Automatic Electrical Controls – Part 2-12: Particular Requirements for Electrically Operated Door Locks, is to be used in conjunction with the Fifth edition of UL 60730-1. The requirements for electrically operated door locks are contained in this Part 2 Standard and UL 60730-1.

Requirements of this Part 2 Standard, where stated, amend the requirements of UL 60730-1.

Where a particular subclause of UL 60730-1 is not mentioned in UL 60730-2-12, the UL 60730-2-12 subclause applies.

These materials are subject to copyright claims of IEC and UL. No part of this publication may be reproduced in any form, including an electronic retrieval system, without the prior written permission of UL. All requests pertaining to the Automatic Electrical Controls – Part 2-12: Particular Requirements for Electrically Operated Door Locks, UL 60730-2-12 Standard should be submitted to UL.

**Note – Although the intended primary application of this Standard is stated in its Scope, it is important to note that it remains the responsibility of the users of the Standard to judge its suitability for their particular purpose.**

## NATIONAL DIFFERENCES

### GENERAL

National Differences from the text of International Electrotechnical Commission (IEC) Publication 60730-2-12, Automatic Electrical Controls – Part 2: Particular Requirements for Electrically Operated Door Locks, copyright 2015, are indicated by notations (differences) and are presented in bold text.

There are five types of National Differences as noted below. The difference type is noted on the first line of the National Difference in the standard. The standard may not include all types of these National Differences.

**DR** – These are National Differences based on the **national regulatory requirements**.

**D1** – These are National Differences which are based on **basic safety principles and requirements**, elimination of which would compromise safety for consumers and users of products.

**D2** – These are national differences from IEC requirements based on existing **safety practices**. These requirements reflect national safety practices, where empirical substantiation (for the IEC or national requirement) is not available or the text has not been included in the IEC standard.

**DC** – These are National Differences based on the **component standards** and will not be deleted until a particular component standard is harmonized with the IEC component standard.

**DE** – These are National Differences based on **editorial comments or corrections**.

Each national difference contains a description of what the national difference entails. Typically one of the following words is used to explain how the text of the national difference is to be applied to the base IEC text:

**Addition / Add** - An addition entails adding a complete new numbered clause, subclause, table, figure, or annex. Addition is not meant to include adding select words to the base IEC text.

**Modification / Modify** - A modification is an altering of the existing base IEC text such as the addition, replacement or deletion of certain words or the replacement of an entire clause, subclause, table, figure, or annex of the base IEC text.

**Deletion / Delete** - A deletion entails complete deletion of an entire numbered clause, subclause, table, figure, or annex without any replacement text.

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

---

### **AUTOMATIC ELECTRICAL CONTROLS – Part 2-12: Particular requirements for electrically operated door locks**

## **FOREWORD**

1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and nongovernmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.

2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.

3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.

4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.

5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.

6) All users should ensure that they have the latest edition of this publication.

7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.

8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.

9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 60730-2-12 has been prepared by technical committee 72: Automatic electrical controls.

This third edition cancels and replaces the second edition published in 2005. This edition constitutes a technical revision. This edition includes the following significant technical changes with respect to the previous edition:
