SCC FOREWORD

National Standard of Canada

A National Standard of Canada is a standard developed by an SCC-accredited Standards Development Organization (SDO), and approved by the Standards Council of Canada (SCC), in accordance with SCC's *Requirements and Guidance-Accreditation for Standards Development Organizations*, and *Requirements and Guidance-Approval of National Standards of Canada Designation*. More information on National Standard requirements can be found at www.scc.ca. An SCC-approved standard reflects the consensus of a number of experts whose collective interests provide, to the greatest practicable extent, a balance of representation of affected stakeholders. National Standards of Canada are intended to make a significant and timely contribution to the Canadian interest.

SCC is a Crown corporation within the portfolio of Industry Canada. With the goal of enhancing Canada's economic competitiveness and social well-being, SCC leads and facilitates the development and use of national and international standards. SCC also coordinates Canadian participation in standards development, and identifies strategies to advance Canadian standardization efforts. Accreditation services are provided by SCC to various customers, including product certifiers, testing laboratories, and standards development organizations. A list of SCC programs and accredited bodies is publicly available at www.scc.ca.

Users should always obtain the latest edition of a National Standard of Canada from the standards development organization responsible for its publication, as these documents are subject to periodic review.

UL Standard for Safety for Lightning Protection Components, UL 96

Sixth Edition, Dated June 30, 2016

Summary of Topics

The Sixth Edition of the Standard for Safety for Lightning Protection Components, UL 96, has been issued to reflect the latest ANSI and SCC approval dates, and to incorporate the proposal dated September 18, 2015.

• Copper alloys and content.

The new and revised requirements are substantially in accordance with Proposal(s) on this subject dated September 18, 2015 and February 26, 2016.

All rights reserved. No part of this publication may be reproduced, stored in a retrieval system, or transmitted in any form by any means, electronic, mechanical photocopying, recording, or otherwise without prior permission of UL.

UL provides this Standard "as is" without warranty of any kind, either expressed or implied, including but not limited to, the implied warranties of merchantability or fitness for any purpose.

In no event will UL be liable for any special, incidental, consequential, indirect or similar damages, including loss of profits, lost savings, loss of data, or any other damages arising out of the use of or the inability to use this Standard, even if UL or an authorized UL representative has been advised of the possibility of such damage. In no event shall UL's liability for any damage ever exceed the price paid for this Standard, regardless of the form of the claim.

Users of the electronic versions of UL's Standards for Safety agree to defend, indemnify, and hold UL harmless from and against any loss, expense, liability, damage, claim, or judgment (including reasonable attorney's fees) resulting from any error or deviation introduced while purchaser is storing an electronic Standard on the purchaser's computer system.

Preface (UL)

This is the Sixth Edition of the ANSI/CAN/UL 96, Standard for Safety for Lightning Protection Components.

UL is accredited by the American National Standards Institute (ANSI) and the Standards Council of Canada (SCC) as a Standards Development Organization (SDO).

This ANSI/CAN/UL 96 Standard for Safety is under continuous maintenance, whereby each revision is ANSI/CAN approved upon publication. If no revisions occur, the initiation of the review of this Standard will commence within 5 years of the date of publication.

In Canada, there are two official languages, English and French. All safety warnings must be in French and English. Attention is drawn to the possibility that some Canadian authorities may require additional markings and/or installation instructions to be in both official languages.

Comments or proposals for revisions on any part of the Standard may be submitted to UL at any time. Proposals should be submitted via a Proposal Request in UL's On-Line Collaborative Standards Development System (CSDS) at <http://csds.ul.com>.

UL's Standards for Safety are copyrighted by UL. Neither a printed nor electronic copy of a Standard should be altered in any way. All of UL's Standards and all copyrights, ownerships, and rights regarding those Standards shall remain the sole and exclusive property of UL.

To purchase UL Standards, visit Comm 2000 at http://www.comm-2000.com/help/how_to_order.aspx or call tollfree 1-888-853-3503.

This Edition of the Standard has been formally approved by the UL Standards Technical Panel (STP) on Lightning Protection Components, STP 96.

This list represents the STP 96 membership when the final text in this standard was balloted. Since that time, changes in the membership may have occurred.

STP 96 Membership

Name	Representing	Interest Category*	Region
Charles Ackerman	East Coast Lightning Equipment	Producer	USA
Brian Barnable	BMO Financial Group	Commercial/Industrial User	Ontario, Canada
Christopher Bean	Alltec	Producer	USA
Jean Blanc	Thomas & Betts	Producer	USA
Grady Briggs	Department of Public Safety	AHJ	New Brunswick, Canada
Matthew Caie	ERICO, Inc.	Producer	USA
Nestor Camerino	US Navy	Government	USA
Peter Carpenter	Lightning Eliminators & Consultants	Producer	USA
Kyle Carrick	Independent Protection Co. Inc.	Producer	USA
Gilles Carrier	PGA Experts Inc.	General	Quebec, Canada
David Cliff	Dominion Lightning Rod Co. Ltd.	Producer	Ontario, Canada
Richard Cohen	Self	General	USA
