Recommended Practice for Determining the Depth of Cut On a Test Probe Contacting the Spinning Blade of a Table Saw, UL RP 3002

First Edition, Dated July 13, 2017

Summary of Topics

This Recommended Practice for Determining Depth of Cut On a Test Probe Contacting the Spinning Blade of a Table Saw, UL RP 3002, provides a test procedure for determining the depth of cut on a test probe after the test probe comes into contact with the spinning blade of a table saw.

All rights reserved. No part of this publication may be reproduced, stored in a retrieval system, or transmitted in any form by any means, electronic, mechanical photocopying, recording, or otherwise without prior permission of UL.

UL provides this Recommended Practice “as is” without warranty of any kind, either expressed or implied, including but not limited to, the implied warranties of merchantability or fitness for any purpose.

In no event will UL be liable for any special, incidental, consequential, indirect or similar damages, including loss of profits, lost savings, loss of data, or any other damages arising out of the use of or the inability to use this Recommended Practice, even if UL or an authorized UL representative has been advised of the possibility of such damage. In no event shall UL’s liability for any damage ever exceed the price paid for this Recommended Practice, regardless of the form of the claim.

Users of the electronic versions of UL’s Recommended Practices agree to defend, indemnify, and hold UL harmless from and against any loss, expense, liability, damage, claim, or judgment (including reasonable attorney’s fees) resulting from any error or deviation introduced while purchaser is storing an electronic Recommended Practice on the purchaser’s computer system.
