TABLE OF CONTENTS

	<u>PAGE</u>
FOREWORD	
PREFACE	1
1. SCOPE	2
2. GLOSSARY	2
3. MATERIALS, WORKMANSHIP AND CONSTRUCTION	3
3.1 General	3
3.2 Capacities	3
3.3 Construction	4
3.4 Valves	5
3.5 Spout	5
3.6 Vent	5
3.7 Top, Bottom and Body of Metal Safety Containers	5
3.8 Seams and Joints of Metal Safety Containers	5
3.9 Support Rings of Metal Safety Containers	6
3.10 Pouring Spouts and Fill Fittings	6
3.11 Pouring Nozzles - Type II Containers	7
3.12 Valves and Valve-Operating Mechanics	7
3.13 Springs	8
3.14 Handles	8
3.15 Attachment of Fittings	8
3.16 Screens or Strainers	8
3.17 Protective Coatings of Metal Safety Containers	9
4. PERFORMANCE	9
4.1 General	9
4.2 Stability	9
4.3 Leakage	9
4.4 Hydrostatic Strength	10
4.5 Valves	10
4.6 Flexible Nozzle	10
4.7 Sheet Brass and Brass Rod	10
4.8 Compatibility	10
4.9 Permeance	11
4.10 Physical Resistance	12
4.11 Spout Cover Assembly Endurance	12
4.12 Handle Strength	12
4.13 Fill and Pouring Valves and Handles	12
4.14 Flammability	12
4.15 Fire Exposure	13
4.16 Burner Flame Application - Plastic Safety Containers	13
4.17 Heated Rod - Plastic Safety Containers	13
4.18 Aging - Plastic Safety Containers	13
4.19 Identification	13
4.20 Ultraviolet Light and Water Resistance - Plastic Safety Containers	13

TABLE OF CONTENTS (Cont'd)

	<u>PAGE</u>
5. TEST METHODS	14
5.1 Construction Material	14
5.2 Stability Test	15
5.3 Leakage Test	15
5.4 Hydrostatic Strength Test	15
5.5 Valve Endurance Test	15
5.6 Flexible Nozzle Test	15
5.7 Mercurous-Nitrate Immersion Test	16
5.8 Compatibility	16
5.9 Permeance Test	16
5.10 Penetration Resistance Test	17
5.11 Environmental Stress Cracking Test	17
5.12 Drop Strength (Room Temperature)	17
5.13 Drop Strength (Reduced Temperature)	17
5.14 Spout Cover Assembly Endurance Test	18
5.15 Handle Strength Test	18
5.16 Strength Test of Fill and Pouring Valves and Handles	18
5.17 Flammability Test	18
5.18 Fire Exposure Test	18
5.19 Burner Flame Application Test	19
5.20 Heated Rod Test	19
5.21 Accelerated Air Oven Aging Test	19
5.22 Identification Tests	19
5.23 Ultraviolet Light and Water Exposure Test	19
6. MANUFACTURING AND PRODUCTION TESTS	20
7. MARKING	21
APPENDIX A	22
A1. PERMEANACE AND PERMEABILITY CALCULATIONS	22

UNDERWRITERS' LABORATORIES OF CANADA

FOREWORD

Certification organizations are periodically called upon to respond promptly to a need to provide a certification service for devices, constructions, materials and systems for which no recognized standards of acceptance are available. Accordingly, the certification agency draws upon its experience, existing specifications and requirements in related areas, together with assistance from its advisory councils to develop and prepare an "Other Recognized Document" (ORD) for use in conducting the necessary tests and evaluation investigation.

Underwriters' Laboratories of Canada has over the years prepared many ORD's in response to requests from, and in conjunction with, industry, code writing bodies, regulatory agencies and others prior to inaugurating a certification programme. In many instances such documents have become published ULC Standards and subsequently National Standards of Canada. It is the intention of Underwriters' Laboratories of Canada to continue this practice, as appropriate.

Comments on the content of this ORD should be directed to the Head Office of Underwriters' Laboratories of Canada, 7 Crouse Road, Scarborough, Ontario, CANADA, M1R 3A9.

NOTE: These Recognized Documents are accepted under the National Standards System of Canada. Reference may be made to the Document CAN-P-3, "Criteria and Procedures for Accreditation of Certification Organization" published by the Standards Council of Canada located at 45 O'Connor Street, Suite 1200, Ottawa, Ontario, CANADA, K1P 6N7.

REQUIREMENTS
FOR THE INVESTIGATION
OF
SAFETY CONTAINERS

PREFACE

This is the First Edition of ULC/ORD-C30-1995, entitled Safety Containers.

A product which complies with these requirements will not necessarily be acceptable if, when examined and tested, it is found to have features not covered by this document which may impair the result contemplated by these requirements.

A product employing materials or having forms of construction differing from those detailed in these requirements may be examined and tested according to the intent of the requirements and, if found to be substantially equivalent, may be given recognition.

Units of measurement used in this document are Metric SI.
