USP Annotated List

General Notices, Monographs, General Chapters, Reagents, and Tables Affected by Changes Appearing in USP 2024, Issue 3

Note—This list only contains In-Process Revision file types. In the lists below, if a section is new or if a subsection is added to or deleted from an existing section, it is labeled as such in parentheses after the section or subsection name. Items on this list that appear without the designation “new”, “added”, or “deleted” are items in which changes have been made to existing official text. The USP Admissions and Annotated lists are updated three times a year: Issue 1 (November), Issue 2 (February), and Issue 3 (June). These documents are static and will not be updated with the monthly revision postings. Although the Annotated List itself carries an official date, each Documentary Standard that is listed may have a different official date. Please open each standard to see its official date. For more questions on official statuses, please visit our Frequently Asked Questions (<https://www.usp.org/frequently-asked-questions/identifying-official-text>).
